Nathan **Flach**

Knowledge Integration & Computer Science
nathanflach.me | ntflach@edu.uwaterloo.ca | 416-660-9011 | Toronto, ON

Skills

- **Known languages:** Python, BASH, SQL, HTML/CSS, JavaScript
- **Development Tools:** Adobe XD, Balsamiq, proto.io, Jenkins CI, JIRA, Git, Trello

Work experience

Developer, JUICE Mobile, Toronto, Ontario, May/2017 – August/2017

- Committed clean python code for North America's leader in innovative reverse auction advertising tech
- Strengthened the quality of the backend platform by producing an automated pytest testing suite
- Displayed my product management ability by tackling numerous support tasks

Quality Engineer, JUICE Mobile, Toronto, Ontario, May/2016 – August/2016

- Created a JavaScript automated testing suite from the ground up to test the front end platform
- Led a four-person testing team using agile methodologies such as Scrum, TDD, and Git management
- Designed wireframes for a programmatic direct platform based on user experience and analytics
- Implemented a Jenkins Continuous Integration testing environment on a Virtual Private Cloud
- Wrote an extensive amount of documentation for the automation process and setting up Jenkins

Agile Test Engineer, Pivotal Labs, Toronto, Ontario, September/2015 – December/2015

- Worked with clients such as NBA, Aeroplan, Uber, Ford, Carnival Cruise, and President's Choice
- An anchor in creating an automated test suite in XCode using Objective-C and the KIF framework
- Diligently monitored test build on a continuous integration server
- Performed weekly story verification and exploratory testing on client projects using QA methodologies
- Wrote BASH scripts to run a variety of android automation tests

Special Ballot Officer, Elections Ontario, Toronto, Ontario, June/2014

- Responsible for counting votes in the 2014 Ontario Provincial Election.
- Satisfied many Election Day Scrutineers with attention to detail by ensuring every ballot was correct

Projects

Museum Exhibit Design, September 2017 – present

- Lead designer for a museum exhibit at the UWaterloo that focuses on several UN Sustainability goals

Personal Website, October/2017

- Created a personal website hosted on GitHub Pages using HTML, CSS, and a JavaScript framework.

BASH Automated Testing Script, July/2016

- Wrote a bash script that targets a specific environment and runs a test suite based on the user's input.

iOS Debugging Tool, December/2015

- Produced a tool that enters text from a terminal onto an iOS device using Objective-C

Education & Awards
